ABOUT US

KOTA ENVIRON

Sanjari Infra, established in 2022, is a trusted name in the construction industry, known for delivering high-quality and reliable infrastructure services. With decades of experience and a commitment to excellence, we specialize in a wide range of services including Construction Services, Flooring Services, and Earth Working Services. As pioneers in the field, we take pride in offering a comprehensive suite of road construction solutions tailored to meet the diverse needs of our clients. Our specialized services include:

- **Road Construction Service**
- **Concrete Road Construction Service**
- **Asphalt Road Construction Service**
- **RCC Road Construction Service**
- **GSB Road Construction Service**
- **WBM Road Construction Service**

At Sanjari Infra, we combine technical expertise with innovation to build roads and infrastructure that stand the test of time. Our team of skilled professionals and modern equipment ensures the timely completion of projects with a strong focus on quality and sustainability. We are committed to contributing to India's growth by laying strong foundations—one road at a time.

Our Products

- **Cleaning Machinery**
- **Hand Rodding Machine**
- **Sewer Cleaning Rod**
- **Manhole Desilting Machine**
- **Sewer Cleaning Power Bucket Machine**
- **Sewer Cleaning Power Rodding Machine**
- **JIB Type**
- **Truck Loader Type**

Cleaning Machinery

Cleaning machinery refers to equipment used to remove clogs, dust, grease, and contaminants from machines and industrial surfaces

- Remove hard clogs & sewer lines.
- Prevents wear, corrosion & breakdowns.
- Improves safety & working conditions.
- Increases machine life span.
- Reduces maintenance costs & downtime

Hand Rodding Machine

A hand rodding machine is a manually operated device used mainly in sewer and drainage maintenance. It consists of flexible steel rods that are joined together.

- Rods are pushed & rotated by hand.
- Manually operated cleaning equipment.
- Used to remove blockages in sewer and drainage pipes.
- Suitable for small-diameter pipes.
- Consists of flexible steel rods joined together.

Sewer Cleaning Rod

A sewer cleaning rod is a simple tool used for clearing blockages in sewer and drainage pipes. It is usually made of steel or flexible metal and comes in short sections that can be joined together.

- Made of steel or flexible metal.
- Simple tool for cleaning sewer and drainage pipes.
- Used to push and rotate inside pipes.
- Removes silt, grease, & solid waste.
- Suitable for small and medium pipes.

Manhole Desilting Machine

A manhole desilting machine is used to remove silt, sludge, and solid waste accumulated in manholes. It works by suction or mechanical lifting, collecting waste into a container or tank for safe disposal.

- Collects waste in a tank or container.
- Used to remove silt and sludge from manholes.
- Works on suction or mechanical lifting principle.
- Prevent sewer blockages & overflow.
- Reduces manual entry into manholes.

Sewer Cleaning Power Bucket Machine

A sewer cleaning power bucket machine is a mechanized device used to clean and remove sludge, silt, and solid waste from sewers and drainage systems.

- Removes sludge, silt, & solid waste.
- Mechanized machine for cleaning sewers and drains.
- Used by municipal authorities and industries.
- Collect waste in a container or tank.
- Uses rotating bucket or chain mechanism to scoop debris.

Sewer Cleaning Power Rodding Machine

A sewer cleaning power rodding machine is a mechanized tool used to remove blockages from sewer and drainage pipes.

- Removes silt, grease, & solid waste.
- Mechanized machine for clearing blocked sewers and drains.
- Rods are rotated and pushed mechanically.
- Uses flexible steel rods.
- Faster and more efficient than manual rodding.

Sewer Cleaning Power Bucket Machine (JIB)

A JIB type sewer cleaning power bucket machine is a specialized mechanical device used to clean sewers and drainage systems, particularly for removing silt, sludge, and solid waste.

- Used to clean sewers and drains.
- Features a JIB arm for better reach and maneuverability.
- Uses rotating bucket or chain mechanism to scoop debris.
- Removes silt, sludge, and solid waste.
- Commonly used by municipal corporations and industries

Sewer Cleaning Power Bucket Machine (Truck)

A truck-type sewer cleaning power bucket machine is a mobile mechanical device mounted on a truck chassis for cleaning sewers and drainage systems.

- Mounted on a truck chassis.
- Used to clean sewers and drainage systems.
- Reduces manual labor and improves efficiency.
- Uses rotating bucket or chain mechanism.
- Suitable for large-scale sewer maintenance.
